

## SIBO Pricing - Patient Fees

Home testing with shipping = \$179

In-House Testing = \$129

### Sliding Scale for In-House Testing (based on financial need)

1.) Use the following items from your most recent Federal Tax Return to calculate your Final Eligibility Number

Item	Definition	Example
1) Household Income	Adjusted Gross Income (AGI) from the most recent Federal Tax Return – this can be found on line 4 of IRS Form 1040EZ, line 21 of IRS Form 1040A, or line 37 of IRS Form 1040	\$ <u>\$100,000</u>
2) Medical Expenses	Medical expenses, incurred in the previous calendar year, not including insurance premium payments that have been itemized on Schedule A, Line 1 of IRS Form 1040 (“Allowed Medical Expenses”)	- \$ <u>(\$12,000)</u>
3) Final Eligibility Number	Subtract Medical Expenses from Household Income to determine Final Eligibility Number	\$ <u>\$88,000</u>

2.) Use your Final Eligibility Number and the table below to determine your cost.

Number of Family Members	Up to 100% FPL	Up to 300% FPL
1	\$11,880	\$35,640
2	\$16,020	\$48,060
3	\$20,160	\$60,480
4	\$24,300	\$72,900
5	\$28,440	\$85,320
6	\$32,580	\$97,740
7	\$36,730	\$110,190
8	\$40,890	\$122,670
Each additional Family Member	\$4,160	\$12,480
<b>Patient Testing Cost</b>	<b>\$50</b>	<b>\$75</b>

# SIBO Testing Available

**Take-Home**

**\$179**

**In-Office**

**\$129**

**(once monthly; income-based  
sliding scale prices available)**

---

Practitioners can request in-office testing via fax or have patient call clinic directly. Lactulose is a prescriptive item and can be run through our clinic. Glucose can be used for SIBO challenge and does not require a prescription.

In-Office Testing is performed once monthly on the first Tuesday of the month (adjusted for holidays as needed).

---

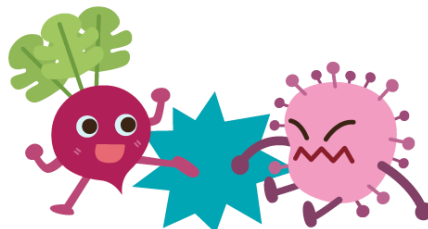

Small intestine bacterial overgrowth (SIBO) is often associated with other underlying illnesses.

Symptoms involving the intestine are non-specific in the early stages and include indigestion, diarrhea, constipation, abdominal pain, and bloating.

As the disease progresses the body can become nutrient deficient.

SIBO can lead to an up-regulated immune system, chronic inflammation, hormone and neurotransmitter imbalances.

SIBO can cause: neuralgia, myalgia, chronic fatigue, fibromyalgia, migraines, seizures, anxiety, insomnia, H. pylori infections, belching, bad-breath, weight-gain and that feeling of "getting old!"
